Page 39, delete lines 13-¹⁶/₁₅:

- ~~provide a confirmation notification message to the counterparties, i.e., provides the banner 100 (Fig. 8) at the top of the monitors 32 of each counterparties, to confirm the term, price and size of the trade, i.e., their respective bids and offers. Once confirmed, the trade is completed;~~

Please replace the paragraph referenced below by page and line numbers with the text following the reference.

Page 42, lines 1-8:

Figs. 9A and 9B depict two exemplary embodiments for multiple order entry screens. For example, Fig. 9B illustrates two bids in a "Cinergy" trading region and an "OCT 1999" trading term for 50 MWh at \$21.25 and \$21.20, line items labeled "2)" and "3)" respectively, and a new, third bid being entered at line item "1)" for 50 MWh at \$21.30. Accordingly, these three bids at varying prices are made instead of one bid for 150 MWh at either the \$21.25, \$21.20 or \$21.30 price. Fig. 9A depicts the multiple order feature within a regional EMON screen wherein multiple bids and/or offers for a "June 2000" forward trading term are shown at lines 102, 104, 106, and 108.
